

Dear Builder Partner,

What we do

yip supplies fully custom, pre-constructed cabinetry, flooring and other building products through a supply chain built for builders. We manage sourcing, logistics, quality control and compliance, making supply easier to coordinate from specification through to site delivery.

Our approach is built to reduce friction on the job. Cabinetry arrives pre-constructed and in installation order, supporting faster installation, cleaner site flow and less time lost managing avoidable site complexity. Our delivery standards are built for real projects, with room placement, unwrapping, condition photos and rubbish removal helping support a more organised handover on site.

We are driven by standards in our procurement, emphasising quality, and customer fit. Our products are regularly tested locally through our NATA-accredited laboratory partner, and our minimum standards are built into the way we work.

Why partner with yip

We want to work with builders who value a well-run job and a strong customer outcome. The right partners for **yip** are practical, responsive and capable of coordinating the broader site services and works around a successful project.

For builders, that means access to a supply chain that reduces site complexity, supports smoother coordination and takes pressure off the back end of the job. It also means clear lineal metre pricing, specification-led quoting, strong delivery standards and a partner that understands builders need both operational reliability and workable commercial terms.

Where there is a fit, we see this as an ongoing relationship. Our aim is to build a trusted network of builders we can work with over time, support properly and introduce into the right opportunities.

What you get

- Comprehensive product range
- Standards-led approach
- Lineal metre pricing
- Pre-constructed cabinetry
- Trade pricing
- Tiered partner rewards
- True partner network
- Lead generation
- Low-touch workflow

Let's talk about exploring a partnership.

If you think there may be a fit, get in touch and we will arrange a conversation to explore how a partnership could work in practice. If there is mutual value, we also have deeper partner documentation ready to share.
